CAUSAL INFERENCE USING DIFFERENCE IN DIFFERENCES

WORKSHOP BY PEDRO H.C. SANT'ANNA

8:30 AM - 11:30 AM

LUNCH PROVIDED

1:30 PM - 4:30 PM

4:30 PM - 5:00 PM Q&A

10 NOVEMBER

FRIDAY, 2023

IN-PERSON

Goizueta Business School
Room W 100 

BY INVITATION ONLY

Space is limited.

**To request an invitation,
please submit your request
by Oct 24th here:**

Difference-in-Differences (DiD) is among the most popular strategies to estimate causal effects. However, the literature is evolving fast, and many new results show that traditional DiD procedures can be biased and lead to erroneous conclusions. This workshop will introduce **Modern DiD** tools that bypass these limitations.

Topics include:

- Understanding DiD methods from first principles;
- Leveraging machine-learning methods to do DiD;
- Problems and solutions to DiD with staggered treatment timing;
- Assessing the plausibility of the DiD results
- Hands-on practice with R and Stata
