EMORY ECONOMICS · UPDATED FALL 2026

# Elective Specializations

Students can choose their economics electives to fit one or more of the eleven following areas of specialization. Specializations consist of four related courses in different areas of economics. Courses for specializations are offered based on faculty availability. Please note that fulfilling a specialization is not required to complete the economics major. A specialization does not appear on a student's transcript and students are responsible for tracking their own progress towards completion of a specialization. All course numbers are ECON.
